ESCI 391 Earth Science Field Experience
Offered in Spring and Fall semesters

All questions should be addressed to Dr. Sawyer (dale@rice.edu, x5106)

This course is designed to provide credit for students who have participated in an Earth Science Field Experience for which no credit can be transferred from another university.

The course can be offered at 1 to 4 credits, depending upon the nature and duration of the field experience. Students will meet with Dr. Sawyer prior to the field experience to determine what amount of credit should be offered.

Students generally register for ESCI 391 in the Fall or Spring semester after they have completed the field experience. The student is expected to present to the department a ~25 min talk on the field experience.

An "Earth Science Field Experience" or a "Geology Field Camp" is required for the BS in Earth Science Geochemistry Track, Geophysics Track, Environmental Earth Science Track, or a Self-Designed track.
